## INSTALLATION INSTRUCTIONS

**01.** If installing the Mishimoto radiator on a 2013–2021 vehicle, skip to step 2. The supplied foam strip will not be used on these model years.

For 2022+ model year vehicles, remove the backing from the adhesive strip on the supplied foam strip. Attach the foam strip centered on the bottom of the radiator, as shown in the photos below.

**02.** Drain the coolant, then remove the stock radiator and fan shroud from the vehicle. Removing the radiator cap will help the coolant drain faster.

**03.** Install the Mishimoto radiator the same way you would install a stock radiator except when attaching the fan shroud. To attach the fan shroud to the Mishimoto radiator, use the (2) supplied M6 bolts and (2) supplied M6 washers.

**04.** Refill and bleed the cooling system. The installation is now complete.

**Congratulations! You have finished your installation.**
